PROFESSIONAL SUMMARY

Backend Developer with hands on experience in designing and developing scalable REST APIs using Java, Spring Boot, and MySQL. Skilled in microservices architecture, Kafka-based event-driven systems, and database optimization. Proficient in building and deploying backend applications using Git and Docker.

SKILLS

Java, Spring Boot, Microservices, REST APIs, Spring Data JPA, Hibernate, Spring Security, Spring Cloud, Kafka, Redis (Caching), SQL (MySQL/PostgreSQL), Git, Maven, CI/CD (GitLab/Jenkins), Docker, Postman, Swagger (OpenAPI).

PROFESSIONAL EXPERIENCE

Junior Backend Developer
PAN 2.0

LTM | Jan 2025 – Present | Noida, UP

- Developed and maintained backend microservices using Java and Spring Boot for PAN 2.0 applications.
- Worked on face authentication module, handling API integration and resolving response-related issues.
- Troubleshoot and fixed production issues related to APIs and database.
- Used Git, Maven, and CI/CD pipelines for development and deployment.
- Collaborated with cross-functional teams in Agile environment.

INTERNSHIPS

The Kennedy Method

Remote (USA) | 05/2024 – 06/2024

Tested the features for the development of *THE KENNEDY METHOD* web application to ensure functionality, usability, and performance across various components.

Helios Spectra Private Limited

Coimbatore | 12/2023 – 01/2024

Analysed healthcare data for the *National Health Service (NHS)* in UK using Google Looker Studio, leveraging advanced analytics and visualization tools to derive actionable insights, improve healthcare outcomes, and optimize resource allocation.

Thiagarajar College of Engineering

Madurai | 01/2023 – 02/2023

Developing a chatbot for the college website to provide accurate and precise information, enabling users to easily access admission details, college timings, SIG details, and other basic information without navigating through multiple fields.

PROJECTS

Logistics Tracking System

Java, Spring Boot, Kafka, MySQL, Docker, Microservices, Spring Cloud

- Designed and developed an event-driven microservices architecture for shipment tracking.
- Implemented asynchronous communication between Shipment, Tracking, Partner, and Notification services using Kafka.
- Developed REST APIs for shipment creation, status updates, and tracking history retrieval.
- Containerized services using Docker and ensured reliable event processing through Kafka consumers.

MediConnect – Healthcare Management System

Java, Spring Boot, Angular, REST APIs, MySQL, Git

- Developed a healthcare management system enabling clinics, doctors, and patients to manage appointments and medical records.
- Implemented role-based access control.

Solar Irradiance Forecasting

Python, Machine Learning, Time Series Forecasting.

- Developed a predictive model to forecast solar irradiance levels using historical weather and environmental data.
- Applied spatiotemporal analysis techniques to capture weather pattern variations and improve forecasting accuracy.
- Analysed and processed large datasets to support renewable energy planning and optimize solar power utilization.
