<https://github.com/arjunprithvi3> | <https://www.linkedin.com/in/arjun-prithvi/>

Summary

Highly motivated and results-driven IT engineer with skills in web development, data analysis, and machine learning. Proficient in frameworks like Spring and experienced in building responsive, intelligent solutions. Eager to contribute to innovative projects and grow within a collaborative team environment.

Skills

Java, Spring Boot, Angular, Machine Learning, SQL, DBMS, OOP, ReactJS, HTML5, CSS3, MongoDB, Firebase, Cloud Computing, Git, GitHub, Google Looker Studio, Tableau.

Projects

Mediconnect - Healthcare Management System | LTIMindtree

09/2025 - 11/2025

Developed a healthcare management system allowing clinics, doctors, and patients to organize appointments and manage medical information through a secure, user-friendly interface.

Car Rental Management System | LTIMindtree (Group Project)

11/2025 - 11/2025

Developed a full-stack application to manage car rentals, including booking, vehicle availability, customer profiles, and payment tracking. Implemented secure authentication and an intuitive user interface.

Cloud-based Application | TCE

03/2024 - 05/2024

Building an E-commerce application using ReactJS, integrating Firebase for real-time updates, MongoDB Atlas for scalable database management, Auth0 for secure authentication, and Dropbox for efficient file storage and collaboration.

Chatbot for College Website | TCE

11/2021 - 03/2024

Developing a chatbot for the college website to provide accurate and precise data, enabling users to easily access information such as admission details, college timings, SIG details, and other basic information without navigating through multiple fields.

Solar Irradiance Forecasting | TCE

10/2022 - 02/2024

This model aims to predict future solar irradiance levels by considering the hidden states of weather conditions and their spatiotemporal variation.

ML-Based Optimization for Enhancing FSO communication resilience | TCE

01/2025 - 05/2025

This objective focuses on designing a machine learning-based model to detect atmospheric turbulence in FSO systems. The model will leverage real-time sensor data, including scintillation index and signal variations, to improve detection accuracy.

Internships

The Kennedy Method | Remote (USA) | 05/2024 - 06/2024

Tested the features for the development of *THE KENNEDY METHOD* web application to ensure functionality, usability, and performance across various components.

Helios Spectra Private Limited | Coimbatore | 12/2023 - 01/2024

Analysed healthcare data for the National Health Service (NHS) in UK using Google Looker Studio, leveraging advanced analytics and visualization tools to derive actionable insights, improve healthcare outcomes, and optimize resource allocation.

Thiagarajar College Of Engineering | Madurai | 01/2023 - 02/2023

Developing a chatbot for the college website to provide accurate and precise information, enabling users to easily access admission details, college timings, SIG details, and other basic information without navigating through multiple fields.

Certifications

Certificate For Completion Of Java Training – **IITB**

Problem Solving Through Programming In C – **NPTEL**

AWS Academy Graduate – AWS Academy Cloud Architecting – **AWS**

Education

Thiagarajar College of Engineering | Information Technology | 05/2025

- Finalist for the **Caterpillar Hackathon**.
- Participated in the **Smart India Hackathon**.
- Organized **TECHUTSAV'24, '25** a national level technical symposium
- Organized the **VALEDICTORY** event of IT department.
- Bagged First place in the Tech connections event conducted by English club.
- Won the Third place in Ready Steady Go event conducted by IoT club.
- Participated in the **HINDU Young World Quiz** organized by The Hindu.

Leadership & Activities

General Treasurer – IT Department

Office Bearer – Cloud Club
